Date Time	Category / Type	Subject	Document Name	User	Action
2020-05-28 11:55 AM	Production Instructions	Forging process of manufacturing	abcd.pdf	John Doe	<div>View</div> <div>Download</div>
2020-05-28 11:54 AM	Sample	sample image	sample.jpg	John Doe	<div>View</div> <div>Download</div>
2020-05-28 11:53 AM	test	test	test.png	John Doe	<div>View</div> <div>Download</div>

hashed abas object id

encoded auth token.  
R&D is required to check the possibility to pass via header instead of query param

In abas screen "new" mode, user will still be able to accach documents. It will assign a tempary id for the instance from the DMS rest service. once the abas object is saved, it will be replaced with the correct object id and other document meta data

This page will be shown in the abas screen, if no files attached, nothing will be displayed.
